

Why did you choose to study at KU?

I choose to continue my study at Kumamoto University because I am interested in the Double Degree Program between ITS and KU, which is offered by the campus. I am joining this double degree program because I want to have experience to solve problem in my country by bringing two perspectives, combining the idea between Indonesia and Japan. And, there is also a similarity between my research interest with the research conducted in my Laboratory.

How is your student life in Kumamoto or Japan?

My research is about flood risk analysis, in my hometown Surabaya. I learn many new subjects during my study at Kumamoto University. It is really exciting for me to study about disaster management in Japan, because Japan has great experience in managing disaster risk.

I also learn how to organize my time, while conducting my research. Because, we are responsible for presenting our research regularly, which is really helpful to monitor our progress.

I am really enjoying my stay in Kumamoto. Because, the place is very beautiful, and it is easy for me to adapt. I am enjoying exploring Kumamoto City in my free time and I hope to visit other places in Japan, and surely this will be a really great experience that I will treasure a lot.

Any message and/or advice to those who wish to study at KU?

Previously, studying abroad seemed like a dream for me. But if we are willing enough and follow up the procedure patiently, I am sure that everyone will succeed. Also, if you are interested in continuing your study at Kumamoto University, don't worry because all people in Kumamoto University will help you sincerely. So please don't hesitate to come to Kumamoto University.
